CARGO LOAD BARS

SUPERIOR TRAILER LOAD LOCKS

Our Cargo Load Bars are used extensively in the trucking and moving industries to fit between the walls of the truck, trailer, or railcar to prevent load shift.

Adjustable to fit varied distances from 89" to 103.5", they are available in either steel or aluminum construction.

These Load Bars have soft rubber ends for easy application and no-slip traction under load. For best results, they are best deployed in tandem pairs.

LENGTH	TYPE	UNITS / CARTON	SHIPPING WEIGHT / UNIT
89" to 103.5"	Aluminum	4	9.92 LBS
89" to 103.5"	Steel	4	12.13 LBS
